Pokemon Platinum Pro is an NDS Rom Hack by cloudforgiven based on Pokemon Platinum in English. And it is now available to download. It was last updated on January 16, 2020. Description
“This is a hard hack that uses Pokemon Platinum Plus made by blue as a base Rom (I did get his permission). I will post his documents below for Pokemon changes/evolutions and locations and I take no credit for the work he has done. One of the great things that really differentiates my hacks from other Platinum hacks is the fact that since trainers have more pokemon and a consistent level curve, it means you don’t have to level grind at all. ALL the trainers and gym leaders have pokemon that are faithful to their movesets based on their level, meaning you wouldn’t find a rattata lv 5 with aeroblast, sacred fire, EQ, draco-meteor. Also some Pokemon (at the 40+ levels) have TM, HM and event moves so don’t complain when you see an entei with flare blitz because he did learn it via a Gen 4 event when Pokemon Platinum was the new game.” –cloudforgiven
