However, you can purchase in-game items with real money. If you wish to disable this, please turn off the in-app purchases in your phone or tablet's Settings.Do Not Sell My Personal Information: Sep 9, 2022 Version 14.2.2 Bug fixes and performance improvements. Monster legends is a terrific strategy game that is complex and a lot to take in at first, but once you get the hang of it, can be the most addicting game you play! I have been playing this game for 6 years and haven't quit once! You start out with a small tutorial showing you the basics and how to play, but soon, you will learn how to feed your monsters, collect gold, see which monsters collect the most gold, fight with your monsters in PvP, Dungeons and on the Adventure Map! You will also soon learn that out of the current 654 monsters that are in the game, you'll start out with commons, uncommons, and even epics, but the entire time you'll want to get the legendaries! And that brings us to the most important part of the game...BREEDING! You can breed 2 monsters together to get other monsters, and you can get good quick with the many breeding combinations online, just gotta search for them! Overall I couldn't ask for a better game not only because its great, but "Socialpoint" never stops the updates and attention to they're biggest game! So thank you for reading this review! But you need to install! Get the game right now, because I promise you'll start off slow, but after some time, you're introduced to a whole new monster world, literally! Go get it and have fun! Monster legends is a complex game but you will get the hang of it, when you start you will get a simple tutorial on feeding your Monsters, getting Monsters, and more just like the simple game. In this game you are able to PVP other Monsters with your Monsters, plus you will want to get the bigger and better Monsters to fight your enemies to win your battles. If you lose don't worry about anything bad it just takes away a few of your trophies which you can make it better. Also I have been playing for a long time now so it is easy, also when you start it will be a little hard but if you play the game for a little bit then you'll get the hang of it and the best part is you have good Monsters, it is easy to know where stuff is, and you will have the islands on the map. What I would do is go to try the challengers game or something on the side, you can get stuff there BUT you have to have the challengers points to try to get one of the Monsters in there if you don't get it don't worry because it won't go away or be your last try you still have a lot of chances left to get it but if you're new just try to get through the game and don't delete it because it is fun. But if you had it for 6 or some years then you can delete it from your device you're using but yeah enjoy the game I hope you have a happy life and take some of my my advice because it could help you through your journey. (: I have been playing Social Point games for as long as I can remember, back from 4-5 years ago. Monster Legends is an amazing and incredible game! The monsters are cool and weird and super creative! I have a team, "Scrats!" The team wars are fun and competitive. However I do wish that there were more inexpensive options of buying a monster, preferably a legendary. I think it'd be nice if we could breed more legendaries instead of like 10 out of 300 or so legendary monsters. And the option of changing my name would be nice as my name LPS WolfLover is a bit odd and I'd appreciate if we could exercise that option. But seriously, this is app is addicting and super fun. One more thing: levels. I'm at level 23 right now and it's getting really boring to play because I don't have anything to do that's new as all the fun things and new things are at level 25 or something. The difference between level 23 and level 25 is numerically small but exp?? EXP? It takes forever! I'm removing obstacles and obstacles upon obstacles! And I can't do the Adventure Map until level 25 because that's when I can upgrade the temples so that my monsters can have higher levels. I mean, I can craft monsters! That's pretty cool. But expensive to get the cells. I'm just trying to give constructive criticism so sorry if this comes off rude or something! But please! Make more inexpensive options! My parents want to save up to go to Italy not for an app that requires 100 dollars for 1700 gems!
